SUMMARY

Detail-oriented professional with experience in content research, data-driven content creation, information management, and quality-focused work. Currently pursuing a Data Analytics course to develop practical skills in MS Excel, data cleaning, data analysis, data interpretation, data manipulation, data preparation, and report generation. Strong ability to work with large amounts of information, identify inconsistencies, maintain accuracy, and organize data systematically.

Looking to transition into a Data Analytics/MIS/Data Operations role where I can apply my existing analytical and documentation skills while gaining hands-on experience with real-world datasets, reporting, data preparation, and MIS processes. Quick learner with strong communication, attention to detail, and a willingness to learn new tools and technologies.

EXPERIENCE

CONTENT WRITER

[Month Year] – Present

Tellychakkar

[Location]

- Research, collect, organize, and verify information from multiple sources before creating content.
- Analyze large amounts of information and identify relevant data points for content development.
- Maintain accuracy, consistency, and quality while handling information under deadlines.
- Perform detailed online research and extract relevant information from different sources.
- Organize information systematically to support accurate reporting and content creation.
- Review and validate information to minimize factual and formatting errors.
- Work independently while managing multiple assignments and meeting deadlines.
- Collaborate with team members and incorporate feedback to improve quality and accuracy.
- Maintain structured documentation and follow established content and quality guidelines.

CONTENT WRITER

[Month Year] – [Month Year]

BollywoodMDB

- Conducted extensive research and collected information from multiple online sources.
- Extracted and organized relevant information for articles and web content.
- Reviewed information for accuracy, consistency, and completeness.
- Worked with structured information and maintained quality standards across multiple assignments.
- Managed multiple tasks while meeting productivity and deadline requirements.
- Applied attention to detail while reviewing and editing content before publication.

CONTENT WRITING / ACADEMIC WRITING EXPERIENCE

[Year] – [Year]

IIM SKILLS / Freelance Projects

- Completed a professional content-writing certification program.

- Completed a three-month internship involving research, content development, and quality review.
- Worked on blogs, articles, academic content, and web-based information.
- Performed research and information extraction from multiple sources.
- Developed strong documentation, proofreading, analytical, and quality-control skills.

PROJECTS

Excel Data Cleaning & Analysis Project | Tools: Microsoft Excel

- Cleaned and organized raw datasets by identifying missing, duplicate, and inconsistent data.
- Applied Excel functions to calculate totals, averages, minimums, maximums, and other business metrics.
- Used sorting, filtering, data validation, and conditional formatting to improve data quality.
- Created Pivot Tables to summarize data by different categories.
- Generated charts and reports to communicate key findings.
- Performed basic descriptive analysis to identify patterns and trends.

Employee Data Analysis | Tools: Microsoft Excel

- Analyzed employee datasets to calculate total employees, average salary, minimum salary, and maximum salary.
- Used Excel formulas and Pivot Tables to analyze employee information by region and other categories.
- Compared salary-related information and identified relevant business insights.
- Prepared summarized reports from raw employee data.

Data Quality & Preparation Practice

- Practicing the process of converting raw data into clean, structured, analysis-ready data.
- Identifying duplicate records, missing values, inconsistent formats, and incorrect entries.
- Applying appropriate Excel techniques to prepare datasets for analysis.
- Practicing data interpretation and converting analytical findings into simple reports.

TECHNICAL SKILLS

Data Analysis

Data Preparation

Data Cleaning

Data Interpretation

Data accuracy and quality awareness

Quick learner

Ability to follow processes and guidelines

Time management

Problem-solving ability

Comfortable working independently and remotely

Ability to handle repetitive and detail-oriented tasks

Willingness to learn new analytical tools and technologies

CERTIFICATIONS

Data Analytics Course – Currently Pursuing

Content Writing Certification – IIM SKILLS

Content Writing Internship – IIM SKILLS

DATA ANALYTICS COURSE

Currently Pursuing – Data Analytics

Currently developing practical knowledge in: - Data Cleaning - Data Preparation - Data Analysis - Data Interpretation - Data Manipulation - Data Extraction - Data Validation - Data Visualization - MIS Reporting - Excel-based Analysis - Pivot Tables - Lookup Functions - Charts and Dashboards - Descriptive Analysis - Report Generation

Objective: Build hands-on experience by working with real-world datasets and applying data analytics concepts to practical business problems.

CAREER OBJECTIVE

To build a career in Data Analytics, MIS, Data Operations, or Data Management by applying my research, documentation, Excel, and analytical skills. I am currently developing my technical knowledge through a Data Analytics course and seeking an opportunity where I can gain hands-on experience with real-world data, data cleaning, preparation, analysis, reporting, and MIS processes while contributing to organizational goals.

ONE IMPORTANT CHANGE I'D RECOMMEND

For this particular vacancy, don't lead with "Content Writer" on your resume. Your headline should immediately tell the recruiter that you're moving toward analytics:

Best headline: Aspiring Data Analyst | MIS & Data Operations | Advanced Excel | Data Cleaning | Data Preparation | Data Analysis

And for the interview question "Why should you be hired?", your strongest angle is: "I am currently pursuing Data Analytics and looking for an opportunity where I can apply what I am learning to real-world data. I already have professional experience that has developed my research, accuracy, documentation, and attention-to-detail skills. I now want to build hands-on experience in data cleaning, preparation, analysis, and MIS reporting. I am a quick learner and confident that I can adapt to the company's processes while maintaining high data quality."

This is much more credible than saying you already have professional data-analytics experience.
